GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

JANUARY, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.	
								%

HIGH AREAS.

Ten areas of high pressure were charted. Five first appeared in the Yukon region, one in Northern Saskatchewan, one near the west shores of Hudson's Bay, and three on the coast line of the Middle Pacific States. One area passed to the northward of, one over, and the others to the southward of, the Great Lakes. The systems were, in general, both important and widespread, and attended by much cold weather.

LOW AREAS.

Seventeen areas of low pressure were charted. Twelve first appeared on or in close proximity to the Alaskan coast, one a little to the northwestward of Hudson's Bay, one in Lower California, and three in Texas. Two areas travelled to the northward of, eleven over, and three to the southward of the Great Lakes, the seventeenth disappearing after reaching Manitoba. The majority of the areas were of pronounced energy, and as a result strong winds were frequent over the Dominion, attended by much precipitation, the latter chiefly as snow.

ATMOSPHERIC PRESSURE.

The differences from mean monthly pressure were as follows: Dawson, —.04; Atlin, +.08; Prince Rupert, +.18; Barkerville, +.06; Victoria, +.10; Vancouver, +.08; Kamloops, —.04; Banff, —.05; Edmonton, —.10; Calgary, —.11; Medicine Hat, —.10; Battleford, —.08; Prince Albert, —.02; Swift Current, —.13; Moose Jaw, +.02; Qu-Appelle, —.10; Minnedosa, .—06; Le Pas, +.01; Winnipeg, —.05; Port Arthur, —.09;White River, —.09; Parry Sound, —.09; Southampton, —.09; Port Stanley, —.06; Toronto, —.08; Kingston, —.05; Stonecliffe, —.07; Ottawa, —.08; Montreal, —.09; Quebec, —.08; Father Point, —.07; Chatham, —.07; St. John, —.08; Charlottetown, —.07; Halifax, —.05; Yarmouth, —.07; Sydney, —.05; Sable Island, —.02; St. John's, —.21; Port aux Basques, —.09; Prospect Fort, Bermuda, +.03.

AURORAS RECORDED.

1. Hillview III, Sioux Lookout, Hay River IV, Qu'Appelle, Port Nelson II, Minnedosa II.

2. Sioux Lookout.

3. Fort Vermilion I, Fort George (James Bay).

4. Wabasca II, Campsie II, Mountain Park, Fort Vermilion II, Hay River I, Saskatoon II, Atlin I, Edmonton I, Qu'Appelle, Fort Resolution, Waseca, Crescent Lake II, Fort Qu'Appelle IV, Hillview II, St. Albans II, Souris IV, Haliburton II, Morrisburg.

5. Sooke III, Cranberry Lake III, Fort Vermilion I, Hay River II, Atlin II, Qu'Appelle.

6. Hudson's Hope II, Fort Vermilion II.

7. Hudson's Hope II, Outlook, Sioux Lookout, Fort George, Atlin III.

8. Wabasca IV, Sioux Lookout, Fort George, Mistassini IV, Port Nelson II.

9. Sioux Lookout, Kakabeka Falls IV, Iroquois Falls, Chicoutimi, Mistassini IV, Atlin IV, Port Nelson II.

10. Sioux Lookout, Iroquois Falls, Chicoutimi, Mistassini IV, Atlin IV, Port Nelson I.

11. Wabasca IV, Campsie IV, Hillsdown II, Fort Vermilion I, Sioux Lookout, Hay River II, Port Nelson II.

12. Ranfurly II, Halkirk, Hillsdown IV, Prince II, Timmins, Renfrew, Madawaska, Saskatoon II, Atlin III, Qu'Appelle.

13. Chinook Cove, Fort Qu'Appelle IV, Hillview IV, St. Albans I, Moose Horn Bay II, Grand Rapids, Souris, Saskatoon I, Atlin IV, Port Nelson I.

14. Fort Vermilion II, Saskatoon, Edmonton I.

15. Sion III, Fort Vermilion IV, Atlin IV.

16. Ranfurly IV, Wabasca IV, Sion III, Halkirk, Hillsdown III, Prince IV, Hillsview III, Souris, Queensborough, Clontarf, Port Nelson II.

17. Wabasca IV, Hillsdown IV, Fort Vermilion I, Waseca, Crescent Lake IV, Hillview II, Mine Centre IV, Hay River II, Saskatoon II, Qu'Appelle, Port Nelson I.

18. Deloraine, Mine Centre IV, Port Nelson I.

19. Okotoks, St. Albans II, Moose Horn Bay IV, Souris IV, Mine Centre IV, Fort George, Hay River IV, Atlin IV, Port Nelson II.

20. Sion III, Fort Resolution, Anglia, Souris IV, Mine Centre IV, Sioux Lookout, Fort George, Haileybury IV, Port Nelson I.

21. Sion IV, Halkirk, Hillsdown IV, Chaplin IV, Fort Qu'Appelle IV, Anglia, Hillview II, St. Albans III, Mine Centre IV, Kenora IV, Sioux Lookout, Fort George, Port Nelson I.

22. Sion IV, Fort Resolution, Anglia, St. Albans IV, Morden III, Grand Rapids, Qu'Appelle, Port Nelson II.

23. Minnedosa II, Sion I, Fort Resolution, Prince II, Fort Qu'Appelle IV, Anglia, Hillview II, Mine Centre IV, Sioux Lookout, Fort George, Hay River IV, Edmonton II, Port Nelson III.

24. Fort Vermilion IV, Waseca, Anglia, Grand Rapids, Treherne III, Mine Centre IV, Sioux Lookout, Mistassini IV, Hay River IV.

25. Ranfurly IV, Wabasca, Sion I, St. Albans IV, Treherne II, Mine Centre IV, Kenora III, Kakabeka Falls IV, Mistassini III, Hay River IV, Port Nelson II.

26. Souris IV.

27. Princeton IV, Sion IV, Mistassini IV.

28. Fort Qu'Appelle IV, Dryden, Ignace, Mistassini IV.

29. Mistassini IV.

30. Hay River IV, Saskatoon II, Minnedosa II.

31. Fort Vermilion IV, Sioux Lookout.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

FEBRUARY, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

FEBRUARY, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.

HIGH AREAS.

Eight areas of high pressure were charted. Seven first appeared over or in close proximity to the Yukon Territory, and one in the North Pacific States. The general course of the areas was over or to the southward of the Great Lakes, thence to the Atlantic seaboard. The systems were in nearly all cases very pronounced and widespread, and attended by very cold conditions, the result being that the weather of the month was very cold in all portions of Canada.

LOW AREAS.

Ten areas of low pressure were charted. Two first appeared on or in close proximity to the Alaskan coast, one on the British Columbian coast; two in the North Pacific States; one in the Middle Pacific States; one in the vicinity of Texas; two in the Middle Atlantic States, and one between Lake Superior and Hudson's Bay. Two of the areas passed to the northward of, five over, and three to the southward of the Great Lakes, thence to the Maritime Provinces and Newfoundland. The systems were in the majority of cases very pronounced, their accompanying strong winds and gales being widely experienced.

ATMOSPHERIC PRESSURE.

The differences from mean monthly pressure were as follows: Dawson, +.16; Atlin, +.23; Prince Rupert, +.18; Barkerville, +.16; Victoria, +.10; Vancouver, +.08; Kamloops, +.09; Banff, +.04; Edmonton, +.07; Calgary, +.03; Medicine Hat, +.08; Battleford, +.07; Prince Albert, +.12; Swift Current, +.05; Moose Jaw, +.17; Qu'Appelle, +.05; Minnedosa, +.02; Le Pas, —.02; Winnipeg, +.01; Port Arthur, —.09; White River, —.15; Parry Sound, —.10; Southampton, —.11; Port Stanley, —.05; Toronto, —.03; Kingston, —.08; Stonecliffe, —.13; Ottawa, —.10; Montreal, —.13; Quebec, —.11; Father Point, —.14; Chatham, —.12; St. John, —.15; Charlottetown, —.11; Halifax, —.11; Yarmouth, —.14; Sydney, —.08; Sable Island, —.03; St. John's, —.19; Port aux Basques, —.11; Prospect Fort, Bermuda, +.04.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

MARCH, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

MARCH, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.

HIGH AREAS.

Eight areas of high pressure were charted. Three first appeared in the Yukon Territory, four in the North Pacific States, and one near Hudson's Bay. Two passed to the northward of, two over, and the remainder to the southward of the Great Lakes, thence to the Atlantic seaboard. The systems as a rule were not very energetic.

LOW AREAS.

Ten areas of low pressure were charted. Six first appeared on or in close proximity to the Alaskan coast, one over Vancouver Island, one in the North Pacific States, and two in the South Pacific States. One area passed to the northward of, seven over, and two to the southward of the Great Lakes, thence to the Atlantic seaboard. Several of the systems were both widespread and energetic, the larger number, however, were of the more moderate type, and as a result the wind mileage over the Dominion was not on the whole large.

ATMOSPHERIC PRESSURE, MARCH, 1917.

The differences from mean monthly pressure were as follows: Dawson, —.26; Atlin, —.11; Prince Rupert, +.04; Barkerville, +.02; Victoria, +.14; Vancouver, +.12; Kamloops, +.01; Banff, —.03; Edmonton, —.07; Calgary, —.07; Medicine Hat, —.09; Battleford, —.14; Prince Albert, —.10; Swift Current, —.10; Moose Jaw, —.05; Qu'Appelle, —.10; Minnedosa, —.09; Le Pas, —.15; Winnipeg, —.09; Port Arthur, —.08; White River, —.08; Parry Sound, —.07; Southampton, —.08; Port Stanley, —.05; Toronto, —.02; Kingston, .00; Stonecliffe, —.03; Ottawa, —.01; Montreal, —.01; Quebec, +.01; Father Point, +.01; Chatham, +.03; St. John, +.05; Charlottetown, +.06; Halifax, +.06; Yarmouth, +.06; Sydney, +.02; Sable Island, +.01; St. John's, —.10; Port aux Basques, +.13; Prospect Fort, Bermuda, +.10.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

APRIL, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

APRIL, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.

HIGH AREAS.

Eight areas of high pressure were charted. Two first appeared in the vicinity of the Yukon Territory, two to the northwestward of Hudson's Bay, three on the coast line of the Middle Pacific States, and one in the Lower St. Lawrence Valley. The systems from the northwestern and northern portions of the continent were quite pronounced and persistent and accompanied by much cold weather, while the others were feeble and of little importance.

LOW AREAS.

Ten areas of low pressure were charted. Four first appeared on the coast line in the far northwestern portion of the continent, one over the southern portion of Vancouver Island, four in the South Pacific States, and one in the West India Islands.

The general path of the continental areas was over or to the southward of the Great Lakes, thence to the Atlantic Ocean. The systems in many cases were widespread and important and of considerable duration, the result being much dull, wet and windy weather in the Dominion, especially from Ontario to the Maritime Provinces.

ATMOSPHERIC PRESSURE.

The differences from mean monthly pressure were as follows: Dawson, —.15; Atlin, +.07; Prince Rupert, —.05; Barkerville, +.02; Victoria, —.07; Vancouver, —.05; Kamloops, —.08; Banff, +.03; Edmonton, +.10; Calgary, —.06; Medicine Hat, +.02; Battleford, +.09; Prince Albert, +.14; Swift Current, +.03; Moose Jaw, +.16; Qu'Appelle, +.08; Minnedosa, +.10; Le Pas, +.21; Winnipeg, +.11; Port Arthur, +.05; White River, +.02; Parry Sound, —.01; Southampton, —.03; Port Stanley, —.03; Toronto, —.03; Kingston, —.02; Stonecliffe, .00; Ottawa, —.02; Montreal, —.02; Quebec, —.01; Father Point, +.01; Chatham, —.03; St. John, —.05; Charlottetown, —.06; Halifax, —.08; Yarmouth, —.08; Sydney, —.05; Sable Island, —.08; St. John's, —.16; Port aux Basques, —.08; Prospect Fort, Bermuda, —.06.

Auroras recorded:

1. Fort St. James, Wabasca III, Fort Vermilion IV, Beaver Lodge, Halkirk, St. Albans III, Grand Rapids, Moose Horn Bay III, Hay River II, Saskatoon II, Fort Hope, Dawson, Atlin III, Edmonton I, Father Point, Sioux Lookout.

2. Wabasca IV, Fort Vermilion III, Campsie I, Sion I, Anglia III, St. Albans III, Moose Horn Bay IV, Saskatoon II, Hay River II, Edmonton III, Port Arthur I, Sioux Lookout.

3. Outlook, Fort George, Hay River II, Saskatoon I, Fort Hope, Quebec IV, Sioux Lookout.

4. Hay River IV, Fort Hope III, Port Arthur I, Kenora IV.

5. Hudson's Hope I, Morden II, Moose Horn Bay III, Mistassini IV, Hay River II, Sioux Lookout, Kenora II.

6. Winnipeg I.

7. Haileybury III, Dawson, Atlin III, Timmins, Madawaska, Iroquois Falls.

8. Roberval IV, Fort Hope III, Haileybury IV, Atlin III, Kingston I, Kakabeka Falls IV, Timmins, Sioux Lookout, Kenora II, Ignace, Mine Centre IV.

9. Sion IV, Haileybury IV, Atlin IV, Timmins, Iroquois Falls.

10. Beaver Lodge.

11. Dawson.

12. Wabasca III, Sion II, Atlin III, Edmonton III, Mine Centre IV.

13.

14. Fort St. James, Wabasca, Jasper, Beaver Lodge, Grand Rapids, Dawson, Atlin III, Edmonton I.

15. Hudson's Hope I, Tappen IV, Vananda IV, Fort St. James, Mine Centre IV, Castlegar, Ranfurly III, Wabasca III, Beaver Lodge, Halkirk, St. Albans I, Grand Rapids, Moose Horn Bay II, Saskatoon I, Wolfville IV, Dawson, Atlin II, Lucknow, Kenora II, Ignace.

16. Grand Rapids, Fort George, Hay River II, Madawaska, Fort Hope III, Haileybury III, Wolfville IV, Dawson, Haliburton II, Lucknow, Mine Centre IV, Atlin III, Port Arthur II, Quebec IV, Barrie IV, Clontarf, Georgetown IV, Timmins, Rutherglen, Queensboro, Lakefield, Wexford.

17. Fort Vermilion III, Drummondville, Sorel, St. Lin, Hay River II, Dawson, Timmins.

18. Ranfurly IV, Wabasca IV.

19.

20. Wabasca IV.

21. Atlin IV, Wexford.

22. Iroquois Falls, Ignace, Mine Centre IV.

23. Timmins, Mine Centre IV.

24. St. John.

25. Outlook, Waseca, Souris, St. Albans IV, Moose Horn Bay III, Atlin I, Minnedosa II, Father Point.

26. Mistassini III, Roberval III, Qu'Appelle II.

27. Wabasca IV, Saskatoon.

28. Hillsdown IV, Prince III, Haileybury IV, Atlin IV, Edmonton III, White River, Lakefield, Iroquois Falls, Haliburton II, Kenora III.

29. Waseca, Haileybury III, Atlin II, Timmins, Queensboro.

30. Saskatoon I, Timmins.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

MAY, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

MAY, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.	
British Columbia—											
South Vancouver Island	51	60	42	18	81	29	1.05	−60	7	0.77	0° to −3°

HIGH AREAS.

Five areas of high pressure were charted; two first appeared on the Alaskan coast line, two to the northward of Hudson's Bay, and one in Alberta. The system which was centred near Port Nelson on the 4th was very pronounced and persistent. One branch drew southwesterly to Colorado on the 5th, and eventually broke up over Alabama on the 10th, while the main area eventually passed southwards to Dakota between the 11th and 13th and ultimately reached the Gulf of Mexico on the 18th. It was attended by unseasonably low temperatures. The second system from the northward was also pronounced. It was situated over Hudson's Bay on the 19th, whence an offshoot travelled to Dakota on the 21st, to Oklahoma on the 23rd, and afterwards south of the Great Lakes and off the New England States. The main area in the meantime apparently moved to Hudson's Straits.

LOW AREAS.

Eleven areas of low pressure were sufficiently well defined to allow of their paths of travel being approximately charted. Two first appeared on the far northwestern coast line of the continent, one in Alberta, three in the Middle Pacific States and five in the far southwestern portion of the continent. Two of the areas passed to the northward of, five over, and three to the southward of, the Great Lakes. The eleventh dispersed in the Southwestern States. The systems were as a rule fairly energetic and widespread, and in most cases they were attended by considerable rainfalls.

ATMOSPHERIC PRESSURE.

The differences from mean monthly pressure were as follows: Dawson, —.05; Atlin, +.04; Prince Rupert, +.07; Barkerville, +.06; Victoria, +.04; Vancouver, +.02; Kamloops, —.04; Banff, +.01; Edmonton, +.05; Calgary, +.04; Medicine Hat, —.02; Battleford, +.02; Prince Albert, +.11; Swift Current, +.03; Moose Jaw, +.11; Qu'Appelle, +.08; Minnedosa, +.10; Le Pas, +.13; Winnipeg, +.13; Port Arthur, .00; White River, +.02; Parry Sound, —.10; Southampton, —.09; Port Stanley, —.10; Toronto, —.10; Kingston, —.09; Stonecliffe, —.07; Ottawa, —.09; Montreal, —.11; Quebec, —.10; Father Point, —.08; Chatham, —.15; St. John, —.17; Charlottetown, —.21; Halifax, —.24; Yarmouth, —.24; Sydney, —.22; Sable Island, —.22; St. John's, —.32; Port aux Basques, —.16; Prospect Fort, Bermuda, —.11.

DEPARTMENT OF MARINE AND FISHERIES, CANADA

MONTHLY RECORD

OF METEOROLOGICAL OBSERVATIONS

JUNE, 1917

GENERAL SYNOPSIS OF TEMPERATURE AND PRECIPITATION.

The following table is intended to show the average values of temperature and precipitation for each province for the month under review. District and Provincial means would, under ideal conditions, be derived from stations distributed in equi-areal squares. But since in reality they are so situate as to appear, rather, constellation-wise upon the map, anomalous values arising from local topographical peculiarities may have received more than their just weight in the computation of the following averages.

Where no difference from normal is assigned, observations over a period long enough for reference are not available.

JUNE, 1917

PROVINCE AND DISTRICT.	Temperature (Fahr.).						Precipitation.				STATION DIFFERENCES FROM NORMAL TEMPERATURE
	Mean Daily.	Mean Daily Maximum.	Mean Daily Minimum.	Mean Daily Range.	Extreme Highest.	Extreme Lowest.	Total in Inches.	Difference from Normal.	Number of Days.	Greatest Fall.

HIGH AREAS.

Six areas of high pressure were charted. One first appeared in the Yukon Territory, one on the British Columbian coast, three on the coast line of the North Pacific States, and one moved into the Gulf of St. Lawrence from the northward. The latter area was the most important of the series. The remaining five were of the usual feeble type of summer high pressure systems.

LOW AREAS.

Thirteen areas of low pressure were sufficiently well defined to allow of their paths being charted—a much larger number than usually occur in the month of June. Three first appeared in the far northwestern portion of the continent, one in Southern British Columbia, one in Southern Alberta, one in the North Pacific States, one in the Middle Pacific States, four in the extreme southwestern portion of the continent, and two off the Florida coast. Four of the areas passed to the northward of, four over, and three to the southward of the Great Lakes, the remaining two dispersing in the western portion of the continent. The systems were largely of the shallow summer type, but attended by much cool, wet weather.

ATMOSPHERIC PRESSURE.

The differences from mean monthly pressure were as follows: Dawson, —.15; Atlin, +.02; Prince Rupert, +.04; Barkerville, +.09; Victoria, +.10; Vancouver, +.09; Kamloops, +.05; Banff, +.04; Edmonton, —.01; Calgary, +.08; Medicine Hat, —.06; Battleford, +.01; Prince Albert, +.05; Swift Curernt, .00; Moose Jaw, +.02; Qu'Appelle, .00; Minnedosa, —.05; Le Pas, —.05; Winnipeg, —.02; Port Arthur, —.01; White River, —.02; Parry Sound, +.03; Southampton, +.01; Port Stanley, +.02; Toronto, +.03; Kingston, +.06; Stonecliffe, +.02; Ottawa, +.01; Montreal, +.04; Quebec, +.07; Father Point, +.09; Chatham, +.11; St. John, +.08; Charlottetown, +.12; Halifax, +.07; Yarmouth, +.10; Sydney, +.15; Sable Island, +.17; St. John's, +.09; Port aux Basques, +.17; Prospect Fort, Bermuda, +.10.
